Fuels and Fuel Additives; Waiver Application

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: On May 9, 1990, the Ethyl Corporation (Ethyl) submitted an application for a waiver of the prohibition against the introduction into commerce of certain fuels and fuel additives set forth in section 211(f) of the Clean Air Act (Act). This application seeks a waiver for the gasoline additive, methylcyclopentadienyl manganese tricarbonyl (MMT), an octane enhancer, commercially labeled by Ethyl as HITEC 3000, to be blended in unleaded gasoline resulting in a level of 0.03125 (1/32) gram per gallon manganese (gpg Mn). The Administrator of EPA has until November 5, 1990 to grant or deny this application. If not denied by that date, it will be deemed to be granted, under section 211(f)(4).

DATES: EPA will conduct a one-day public hearing on this application beginning at 8:30 a.m. on June 22, 1990 at the U.S. EPA Auditorium located in the EPA Education Center (Northwest Mall Entrance), 401 M Street SW., Washington, DC 20460. Comments on this application will be accepted until July 22, 1990. Parties wishing to testify at the hearing should contact David J. Kortum or James W. Caldwell by June 15, 1990 at (202) 382-2635. It is also requested that six copies of prepared hearing testimony be available at the time of the hearing for distribution to the hearing panel. Hearing testimony should also be submitted to the docket. Additional information on the submission of comments to the docket may be found below in the "ADDRESSES" section of this notice.

ADDRESSES: Copies of the information relative to this application are available for inspection in public docket A-90-16 at the Air Docket (LE-131) of the EPA,

room M-1500, 401 M Street SW., Washington, DC 20460, (202) 382-7543, between the hours of 8:30 a.m. to noon and 1:30 p.m. to 3:30 p.m. weekdays. Any comments from interested parties should be addressed to this docket with a copy forwarded to Mary T. Smith, Director, Field Operations and Support Division (EN-397F), U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460. As provided in 40 CFR part 2, a reasonable fee may be charged for copying services.

FOR FURTHER INFORMATION CONTACT:

David J. Kortum, Environmental Engineer, Field Operations and Support Division (EN-397F), U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460, (202) 475-8841.

SUPPLEMENTARY INFORMATION: Section 211(f)(1) of the Act makes it unlawful, effective March 31, 1977, for any manufacturer of a fuel or fuel additive to first introduce into commerce, or to increase the concentration in use of, any fuel or fuel additive for use in light duty motor vehicles manufactured after model year 1974 which is not substantially similar to any fuel or fuel additive utilized in the certification of any model year 1975, or subsequent model year, vehicle or engine under section 206 of the Act. EPA has defined "substantially similar" at 46 FR 38582 (July 28, 1981). Section 211(f)(4) of the Act provides that upon application by any fuel or fuel additive manufacturer, the Administrator of EPA may waive the prohibitions of section 211(f)(1) if the Administrator determines that the applicant has established that such fuel or fuel additive will not cause or contribute to a failure of any emission control device or system (over the useful life of any vehicle in which such device or system is used) to achieve compliance by the vehicle with the emissions standards to which it has been certified pursuant to section 206 of the Act. If the Administrator does not act to grant or deny a waiver within 180 days of receipt of the application (in this case, by November 5, 1990), the statute provides that the waiver shall be treated as granted.

The current submission by Ethyl is an application under section 211(f)(4) of the Act for a waiver for the fuel additive methylcyclopentadienyl manganese tricarbonyl (MMT), commercially labeled by Ethyl as HITEC 3000, to be blended in unleaded gasoline resulting in a level of 0.03125 (1/32) gram per gallon manganese (gpg Mn). This is Ethyl's third application for a waiver for MMT. Ethyl's first application was submitted on March 17, 1978 for concentrations of MMT resulting in 1/16

and 1/32 gpg Mn in unleaded gasoline. Ethyl's second application was submitted on May 26, 1981 for concentrations of MMT resulting in 1/64 gpg Mn in unleaded gasoline. The Administrator denied these requests for waivers. The decisions and justifications thereof may be found in the September 18, 1978 Federal Register, 43 FR 41424, and the December 1, 1981 Federal Register, 46 FR 58630. If the prohibitions against MMT were waived by the Administrator, it is highly likely that most U.S. gasoline would contain some level of MMT, and, therefore, it is also highly likely that fuels used in certifying vehicles under section 206 of the Act, would be required to reflect this compositional change. EPA invites comments on whether the Administrator should grant or deny this waiver application.

Dated: May 29, 1990.

Michael Shapiro,

Acting Assistant Administrator for Air and Radiation.

TSCA Chemical Testing; Receipt of Test Data

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces the receipt of test data on Octamethylcyclotetrasiloxane (OMCTS) (CAS No. 556-67-2), and diisodecyl phenyl phosphite (PDDP), (CAS No. 25550-98-5), submitted pursuant to a consent order under the Toxic Substances Control Act (TSCA). Publication of this notice is in compliance with section 4(d) of TSCA.

FOR FURTHER INFORMATION CONTACT:

Michael M. Stahl, Director, Environmental Assistance Division (TS-799), Office of Toxic Substances, Environmental Protection Agency, Rm. E-543B, 401 M St., SW., Washington, DC 20460, (202) 554-1404, TDD (202) 554-0551.

SUPPLEMENTARY INFORMATION: Under 40 CFR 790.60, all TSCA section 4 consent orders must contain a statement that results of testing conducted pursuant to these testing consent orders will be announced to the public in accordance with section 4(d).

I. Test Data Submissions

Test data for OMCTS was submitted by Silicones Health Council on behalf of

the SHC member companies pursuant to a consent order at 40 CFR 799.5000. It was received by EPA on May 10, 1990. The submission describes: (1) Acute toxicity to sheepshead minnow (2) acute toxicity to mysid shrimp, (3) acute toxicity to daphnids, (4) chronic toxicity to daphnids, (5) toxicity to the freshwater *selenastrum capricornutum*. These tests are required by this test rule. This chemical is used as an intermediate in the production of polydimethylsiloxane.

Test data for PDDP was submitted by General Electric Specialty Chemicals on behalf of the test sponsors and pursuant to a consent order at 40 CFR 799.5000. It was received by EPA on May 22, 1990. The submission describes a subchronic delayed neurotoxicity study in mature hens. Neurotoxicity testing is required by this test rule. This chemical is used primarily as a low-cost light stabilizer and secondary antioxidant for polymeric materials.

EPA has initiated its review and evaluation process for these data submissions. At this time, the Agency is unable to provide any determination as to the completeness of the submissions.

II. Public Record

EPA has established a public record for this TSCA section 4(d) receipt of data notice (docket number OPTS-44553). This record includes copies of all studies reported in this notice. The record is available for inspection from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays, in the TSCA Public Docket Office, Rm. NE-G004, 401 M St., SW., Washington, DC 20460.

Authority: 15 U.S.C. 2603.

Dated: May 30, 1990.

Charles M. Auer,

Acting Director, Existing Chemical Assessment Division, Office of Toxic Substances.
